SUMMARY

With over 2 years of experience in full-stack development, I bring strong expertise in building robust web applications using ASP.NET Core and Angular. I have hands-on experience with SQL databases, RESTful APIs, and cloud deployment on platforms like DigitalOcean. A key highlight of my journey so far has been independently managing the development of a language learning platform used across web and mobile.

FINAL YEAR PROJECT

Role: Full Stack Developer / Group Lead

LanguageLab - Language Learning Platform

📅 08/2024 - 06/2025 📍 Islamabad, Pakistan

- Led the development of LanguageLab, a multilingual platform enabling story-based language learning with interactive flashcards and vocabulary quizzes.
- Designed and implemented a robust ASP.NET Core + SQL Server backend with JWT authentication, Excel integration, and user-specific content delivery.
- Built a dynamic language-filtering system where users access content based on selected language (German/French).
- Developed personalized flashcard features allowing each user to save and review their own vocabulary sets.
- Created a fully responsive frontend using Angular and Bootstrap with strong focus on clean UI/UX.
- Deployed both Frontend and APIs to DigitalOcean using FileZilla, ensuring reliable cloud-based delivery.
- Managed team collaboration, code quality, sprint planning, and project documentation end-to-end.

PROJECTS

QuickAppointments

A role-based appointment system built with ASP.NET Core and Angular. Features include JWT authentication, doctor availability management, secure slot booking, and an admin panel for managing users and departments. UI styled with Tailwind CSS.

Bank Transactions Web App

Built a secure and responsive web app using ASP.NET MVC, jQuery AJAX, and Bootstrap for managing bank transactions and real-time withdrawals. Features include dynamic user interactions and secure sign-up/login functionality.

Customer Support Web App

Developed a full-featured support ticketing system using ASP.NET Core and Angular. Implemented JWT authentication and role-based access control for customers. Users can create, update, track, and comment on tickets. Designed for efficient issue tracking with a clean, user-friendly interface.

EDUCATION

Bachelor of Science in Information Engineering Technology

National Skills University Islamabad

📅 09/2022 - 10/2026 📍 Islamabad, Pakistan

SKILLS

Server-side

C# | .NET Core | ASP.NET MVC

TypeScript | RESTful APIs

Client-side

HTML/CSS | JavaScript | Angular

jQuery | Bootstrap | Tailwind CSS

Databases

Entity Framework | SQL Server | MySQL

PostgreSQL

Deployment and Tools

Digital Ocean | PuTTy | FileZilla

Nginx | SSH | Asp.NET | Production

Productivity Tools

GitHub Copilot | Gemini

Tools

Visual Studio | Visual Studio Code

Postman | Swagger | SSMS | npm

pgadmin

Soft Skills

Communication Skills | Problem Solving

Critical Thinking | Efficient Learner

Hobbies

Reading Books | Traveling | Gaming
